

I want to express my concern over Satellite Radio and their intrusion into local broadcasting. At first, they promised not to do local news and or traffic and weather. If they are allowed to continue with this, we are in danger of being controlled by two companies when it comes to the information that we receive in any given market. More than ever, we should be worried about the possibility of monopolies controlling attitudes and beliefs.  
I think we need to stand up for once and say no.
